Random Number Generator Certificate

URL: www.isoftbet.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by iSoftBet and found that the RNG complies with the relevant standards.*

The RNG uses a widely recognized algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for single decks (no joker, 1 joker and 2 jokers), 4 decks, 6 decks, 8 decks and 10 decks. iTech Labs has also conducted scaling tests for the roulette games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

*   The RNG was tested according to Alderney Gambling Control Commission (AGCC), UK
    Gambling Commission, Isle of Man, Malta and AAMS (Italy) standards.

   The software provider or operator of the gaming site may not necessarily be licensed in the gaming
   regulatory jurisdiction whose technical standards have been applied in the testing process. Before
   making enquiries with the gaming commission, check whether the gaming commission's logo is present
   on the gaming site's home page or undertake independent enquiries with the operator of the website.
